SUMMARY

Data and reporting analyst with an MSc in Advanced Computer Science from the University of Exeter, specialising in Power BI, SQL, Python, statistical analysis and machine learning. Experienced in transforming large, imperfect datasets from multiple sources into quality-assured dashboards, forecasts and clear reports for non-technical audiences. Recent work includes an end-to-end analysis of Environment Agency hydrology records and South West Water storm-overflow data, covering data validation, trend and anomaly analysis, forecasting and Power BI reporting.

TECHNICAL SKILLS

Business intelligence and reporting	Power BI, data modelling, DAX, KPI definition, dashboard development, Excel
Data management and analysis	SQL, Python, pandas, data integration, transformation and exploratory analysis
Data quality	Validation, completeness checks, duplicate handling, anomaly detection, documented QA decisions
Advanced analytics	Regression, forecasting, machine learning, model evaluation and baseline comparison
Communication and delivery	Written reporting, explaining technical findings to non-technical audiences, requirements interpretation and managing competing priorities
Development tools	Git, GitHub, APIs, Supabase, Flutter/Dart

DATA PROJECTS

Rainfall, River Flow and Storm Overflows in Devon and Cornwall | Python, SQL, Power BI | azed.uk/water.html

- Integrated 2015–2025 rainfall and river-flow records from the Environment Agency Hydrology API with South West Water's 2025 storm-overflow dataset, covering 209,711 recorded events across 1,179 sites.
- Designed and documented QA checks for duplicates, data-quality ratings and implausible event durations, ensuring that exclusions and analytical assumptions were transparent and reproducible.
- Identified temporal trends, anomalies and operational concentrations, including the relationship between antecedent rainfall and River Exe flow and the concentration of discharge hours among higher-activity sites.
- Developed and evaluated a next-day river-flow forecast against a persistence baseline, achieving a Nash–Sutcliffe efficiency of 0.85 compared with 0.78.
- Produced a six-page Power BI dashboard using DAX measures, supported by 11 SQL queries and a written report designed for non-technical readers.

Credit Risk Analytics and Policy Scenario Analysis | SQL, Python, Power BI | azed.uk/credit-risk.html

- Built a customer-level dataset by joining several relational tables and engineered affordability and behavioural features for risk segmentation.
- Analysed portfolio and segment risk, finding default risk concentrated in particular customer groups, and modelled approval-versus-risk trade-offs under different credit thresholds in an interactive dashboard.

UK Railway Performance Analysis | Power BI, SQL, Python | azed.uk/railway.html

- End-to-end analysis of rail performance and ticketing data, with dashboards tracking delays, pricing and route performance.

WORK EXPERIENCE

KFC (Clokken Limited franchisee)
Exeter, UK | Full-time 2024 – present

- Deliver reliable customer service in a fast-paced, standards-controlled environment while managing several competing tasks.
- Coordinate with colleagues during peak periods, communicating clearly and responding quickly to changing operational priorities.
- Follow defined quality, hygiene and food-safety procedures consistently, with strong attention to accuracy and detail.

EDUCATION

MSc in Advanced Computer Science
University of Exeter | Exeter, UK (Awarded with Merit) Sep 2023 – Nov 2024

- Coursework: Machine Learning, Learning from Data, Social Networks and Text Analysis, Computer Vision, High-Performance Computing, Research Methodology.
- Dissertation: Balancing Accuracy and Fairness in Logistic Regression Through Multi-Objective Optimization.

MSc in Artificial Intelligence
Islamic Azad University, Lahijan, Iran Nov 2015 – Jan 2018

- Modules: Machine Learning, Pattern Recognition, Neural Networks, Advanced Data Mining.
- Thesis: Human activity recognition in 3D video using deep belief networks.

BSc in Software Engineering
Islamic Azad University, Lahijan, Iran Sep 2010 – Oct 2015

- Included probability and statistics, mathematics and databases.

SOFTWARE PROJECTS

- TiTil Studio (founder, 2026–present): an independent studio that designs, builds and ships mobile apps. Stack: Flutter/Dart, Supabase, Firebase.
- Holddd (live on iOS and Android): a "pause before you buy" finance app. A 24-hour timer, savings tracking, budget goals and spending insights help people turn impulse purchases into real savings. Built with Flutter and Supabase.

LANGUAGES

- English: MSc taught and examined in English at the University of Exeter (2023–2024).
- Persian: Native.
